samaabdelnaser776@gmail.com

Professional summary

Detail-oriented Software Engineering student with a strong focus on Data Analysis, Data Mining, and Big Data technologies. Experienced in building data pipelines using Kafka and Ni Fi, processing large-scale datasets with Spark, and developing analytical solutions using Python, SQL, and Power BI. Committed to leveraging data engineering and analytics skills to deliver scalable and impactful solutions.

Education

B.Sc. computer science and artificial intelligence Helwan university

| Expected 2027

- Cumulative grade: 3.41 (excellent)

STEM education | Obour

| 2020- 2023

Experience

Freelance Data Analyst & Full-Stack Developer

| 2025 – Present

- Analyzed and transformed large datasets using **Python and SQL** to extract actionable insights and support data-driven decision-making.
- Designed and developed interactive **Power BI dashboards**, applying advanced **DAX functions** to build KPIs, calculated measures, and dynamic reports.
- Processed and cleaned raw data to ensure accuracy, consistency, and reliability before analysis.
- Built automated reporting solutions that reduced manual reporting efforts and improved workflow efficiency.
- Worked with datasets exceeding **30K+ records**, performing exploratory data analysis and trend identification.
- Developed custom web interfaces using **JavaScript, Bootstrap, and Tailwind CSS** to present analytical results in a user-friendly and visually engaging format.
- Collaborated with clients to understand business requirements and translate them into analytical solutions that improved decision-making and user satisfaction.

Extracurricular activities

Kafala Program | volunteer | Ressala Charity Organization

| 2022-2024

- Coordinated blood donation campaigns for Thalassemia patients through donor communication and follow-up.

- Managed and updated donor records using **Excel**, ensuring data accuracy and eligibility classification (permanent/temporary restrictions).
- Tracked the process from donor confirmation to blood delivery, ensuring smooth operational flow.

Courses & certifications

Digital Egypt Pioneers Initiative (DEPI) | Microsoft Power BI Engineering Track | In Progress

- Training in data modeling, transformation, and dashboard development using Power BI.
- Applying DAX functions for KPIs and dynamic reports.
- Hands-on projects with real-world datasets for analysis, visualization, and decision support.
- Integrated practical freelancing experience: managing project requirements, building custom dashboards, and delivering solutions to client-like scenarios.

Sprints x Microsoft Summer Camp - AI and Machine Learning

| 2025-2026

- Hands-on training in AI concepts, machine learning algorithms, and predictive modeling.
- Developed small-scale ML projects using Python and analytical tools.
- Gained practical experience applying data-driven solutions to real-world scenarios.

Projects

Connect 6 game -python

Player performance analytics -Ni-Fi, Kafka, spark

Skills

C	CSS	Kafka	English: advanced
C++	HTML	Ni-Fi	Arabic: mother language
Java	cs50	Spark	
Python	Excel	Bootstrap	
SQL	Power BI	Microsoft office	
JavaScript	DAX	Canva
